# AUTHOR'S NOTE

This is the fifth edition of *TOP POP SINGLES*. It is hard to believe that 17 years have passed since the first edition was published in 1970. From that first crude 208-page edition, to this volume, nearly four times that size, I have had the great pleasure to work in the most exciting and unpredictable industry in the world. Researching the *Billboard* charts, collecting the charted hits, and publishing musical record books has truly been a 'labor of love'. This simple cliché is an apt summary of a career that is really just an extension of a hobby.

My initial research of the *Billboard* pop charts, compiled on 3 × 5 cards, was intended solely as a means of cataloging my burgeoning record collection. With little or no inclination that others shared a devotion to the charts, I felt that my interest in chart statistics and record collecting bordered on fanaticism. It didn't take long to discover that there were thousands of music fans with a similar fascination of exploring the depths of the American record charts.

Through the tremendous national and international support of my publications from disc jockeys and record fans, I have been able to expand my research to include not only the singles and albums of *Billboard's* pop charts, but also the various other weekly *Billboard* charts. Followers of the Country and Black charts can look forward to our upcoming expanded revisions of these books, as well as many other projects that are currently in the works.

While planning this edition, I wanted to greatly enlarge the artist biographies and various other notes of trivia so that a single volume would offer information on not only the charted hits, but on the artists supplying these hits. So, for most of the top artists in this edition, you will find a paragraph covering the highlights of that artist's career. I had hoped to provide at least one line of trivia for each of the 4,186 artists listed herein. However, even with all the research at my disposal, I simply could not find facts for many of the 'one-shot' artists. If you have supporting evidence about any artist in this book who does not have a biographical entry, I would appreciate hearing from you. I will continue to seek out information on these obscure artists and update the notes on the established ones to make further editions even more complete and valuable.

A novel feature to this edition are the listings of the peak positions and the various *Billboard* pop charts under many of the song titles from 1955-1958. During this period, *Billboard* published multiple pop charts. Now that all chart activity of each of these hits is listed, you can decide which ranking you qualify as the decisive one.

Once again, thanks to all of you for your continued support, encouragement, and patience in waiting for these revised editions. It is my goal to make these revisions available every two years — a timetable that you can rely on. Please continue to write and let us know of any corrections or improvements you would like to see.

# RESEARCHING THE BILLBOARD POP CHARTS

On August 4, 1958, *Billboard* debuted its *Hot 100* chart. Since that date, the *Hot 100* has been widely recognized as the definitive source for the weekly ratings of America's most popular records. The majority of records listed in this volume were charted between 1958 and 1986, and therefore, their chart statistics were compiled exclusively from the *Hot 100*. Previous to this chart, *Billboard* published a *Top 100* chart which debuted in November of 1955. This chart was not considered as reliable as the *Hot 100*, and was published weekly, along with a number of other pop charts which focused on specific areas of the music trade. By October of 1958, all of these charts were discontinued in favor of the all-encompassing *Hot 100*.

Here are the pop charts that were researched for this book:

Chart Title	Dates Published	Chart Size
Best Sellers In Stores	Jan. 1, 1955-Oct. 13, 1958	25-50
Most Played By Jockeys	Jan. 1, 1955-July 28, 1958	20-25
Most Played In Juke Boxes	Jan. 1, 1955-June 17, 1957	20
Top 100	Nov. 12, 1955-July 28, 1958	100
Hot 100	Aug. 4, 1958-present	100

Two other pop charts were consulted so that this book would truly be a complete record of any popular single that may have achieved a ranking on any of the *Billboard* pop charts. These charts are the "**Coming Up Strong**" charts (a continuation of the Best Sellers chart - July 16, 1955-July 28, 1958) and the "**Honor Roll Of Hits**" chart (a listing by tune - not by artist - Jan. 1, 1955-Nov. 16, 1963). These charts were checked only for those records which made these charts and did not make any other *Billboard* Pop chart. 40 points (or positions) were added to the 26 records that made only these charts. Example: if one of these records peaked at position #5, it's highest position in this book would be shown as #45.

A chart-by-chart breakdown of the highest position a record attained on any of the above 1955-1958 *Billboard* Pop charts is listed below the title. However, if a record hit *only* the *Top 100* or *Hot 100*, no chart information is shown below that title. Keep in mind, records that peaked at positions 51-100 could only have charted on the *Top 100* or *Hot 100*.

- pre) If a record enters a newly published chart well after the record's peak chart performance, the word **pre** is shown after the position - meaning that the highest position would have been higher had the chart been published earlier.
- end) If a record had not yet peaked on a chart that was terminated, the word **end** is shown after the position - meaning that its highest position would probably have been higher had the chart continued.

Many artist listings have been reorganized in this edition so that an artist's complete chart history is at your fingertips. For example, a song by a duo, such as Paul McCartney & Michael Jackson, is now listed under both McCartney and Jackson. The precise duo name is shown in bold type below the song title.

The record's Debut Date is taken from whichever chart it first appeared on. The date shown is *Billboard*'s actual issue date, and is not taken from the "week ending" dates as shown on the various charts when they were originally published. The issue and week ending dates were different until January 13, 1962, when *Billboard* began using one date system for both the issue and the charts inside.

The record's *highest position* (**PEAK POS**) is taken from the chart on which it achieved its highest ranking.

The record's *weeks charted* (**WKS CHR**) and weeks at positions No. 1 or No. 2 are taken from the chart on which it achieved its highest total.

# EXPLANATION OF DATA AND SYMBOLS

The artist section lists each artist's charted hits in chronological order. A sequential number is shown in front of each song title to indicate that artist's number of charted hits. All Top 10 hits are highlighted in dark type.

## EXPLANATION OF COLUMNAR HEADINGS:

**DEBUT DATE:** Date record first charted

**PEAK POS:** Record's highest charted position (highlighted in bold type)

**WKS CHR:** Total weeks charted

**LABEL & NUMBER:** Original record label and number

## OTHER DATA AND SYMBOLS:

(<sup>1</sup>) A superior number next to a record that peaked at No. 1 or No. 2 indicates the total weeks the record held that position.

(+) Indicates record peaked in the year after it first charted

(●) RIAA certified gold record (million seller)

(▲) RIAA certified platinum record (two million seller)

The Record Industry Association of America began certifying gold records in 1958 and platinum records in 1976. Prior to these dates, there are most certainly some hits that would have qualified for these certifications. Also, some record labels have never requested RIAA certification for their hits.

Letter(s) in brackets after titles indicate:

[I] Instrumental recording

[N] Novelty recording

[C] Comedy recording

[S] Spoken word recording

[F] Foreign language recording

[X] Christmas recording

[R] Reissue of a previously charted single

(/) This symbol is shown when dividing a two-sided hit. Complete chart data is shown for each side except in cases where both sides of a record were shown as a single listing on the charts. For the "B" side of these records, only the weeks it charted as a "tag along" are listed.

See *Researching The Billboard Pop Charts* for an explanation of chart names listed under some records from 1955-58.

Bill Buchanan and Richard "Dickie" Goodman conceived the idea of a radio show being interrupted by reports of flying saucers in 1956. Segments of popular records were taped and spliced into the dialogue. The record was heard by Alan Freed and he played it on his WINS-New York radio show. A national hit resulted and the "break-in" record was born. Buchanan left the music business in 1959, but Dickie Goodman remains active. Also see Dickie Goodman.

Originally consisted of studio musicians Dave Burgess, rhythm guitar; Buddy Bruce, lead guitar; Danny Flores (later changed name to Chuck Rio), sax; Cliff Hills, bass; Gene Alden, drums. Shortly after "Tequila" became a hit, Bruce and Hills were replaced by Dale Norris and Joe Burnas. Eight months after recording "Tequila", Flores and Alden left and were replaced by Jimmy Seals (sax) and Dash Crofts (drums). Other personnel changes followed and in 1960 guitarist Glen Campbell spent some time in the group.

<b>BING CROSBY</b> The most popular entertainer of the 20th century's first 50 years. Harry Lillis Crosby was born on 5/2/01 (or 04) in Tacoma, Washington. He and singing partner Al Rinker were hired in 1926 by Paul Whiteman; with Harry Barris they became the Rhythm Boys and gained an increasing following. The trio split from Whiteman in 1930, and Bing sang briefly with Gus Arnheim's band. It was his early-1931 smash with Arnheim, "I Surrender, Dear", which earned Bing a CBS radio contract, and launched an unsurpassed solo career. Over the next three decades the resonant Crosby baritone and breezy persona sold more than 300 million records and was featured in over 50 movies (won Academy Award for "Going My Way", 1944). Bing died of a heart attack on a golf course on 10/14/77.

Changed name to The Four Lovers in 1956. Bob Gaudio (of The Royal Teens) joined as keyboardist and songwriter in 1959, replacing Nick DeVito. Nick Massi replaced Majewski, and their 1961 line-up was set: Valli, Gaudio, Massi and Tommy DeVito. Group had been doing session work for their producer Bob Crewe and took their new name from a New Jersey bowling alley, The Four Seasons. <b>BUDDY HOLLY</b>				
Born Charles Hardin Holley on 9/7/36 in Lubbock, Texas. Began recording (western & bop) demos with Bob Montgomery in 1954. Signed to Decca label in January, 1956, and recorded in Nashville as Buddy Holly & The Three Tunes (Sonny Curtis, lead guitar; Don Guess, bass; and Jerry Allison, drums). In February of 1957, Buddy assembled his backing group, The Crickets (Allison; Niki Sullivan, rhythm guitar; and Joel B. Mauldin, bass) for recordings at Norman Petty's studio in Clovis, New Mexico. Signed to Brunswick and Coral labels (subsidiaries of Decca Records). Because of contract arrangements, all Brunswick records released as The Crickets, and all Coral records released as Buddy Holly. Buddy moved to New York and split with The Crickets in the autumn of 1958. Buddy, Ritchie Valens and the Big Bopper were killed in a plane crash near Mason City, Iowa on 2/3/59 (22).

			<b>THE PLATTERS</b> R&B group formed in Los Angeles in 1953. Consisted of Tony Williams (b: 4/5/28, Elizabeth, NJ), lead; David Lynch, tenor; Paul Robi, baritone; Herb Reed, bass; and Zola Taylor. Taylor had formerly sung with Shirley Gunter's Queens. Group first recorded for Federal in 1954, with Alex Hodge instead of Robi, and without Zola Taylor. Hit "Only You" was written by manager Buck Ram and first recorded for Federal, who did not want to use it. To Mercury in 1955, re-recorded "Only You". Williams left to go solo, replaced by Sonny Turner in 1961. Taylor replaced by Sandra Dawn; Robi replaced by Nate Nelson (formerly in The Flamingos) in 1966. Several unrelated groups use this famous name today.

# THE SONG TITLE SECTION

This section lists, alphabetically, all titles in the artist section. The artist's name is listed next to each title along with the highest position attained and year of peak popularity. Some titles show the letter F as a position, indicating the title was listed as a flip side and did not chart on its own.

A song with more than one charted version is listed once, with the artists' names listed below in chronological order. Many songs that have the same title, but are different tunes, are listed separately, with the most popular title listed first. This will make it easy to determine which songs are the same composition; the amount of charted versions of a particular song; and which versions were the most popular.

Cross references have been used throughout to aid in finding a title. If you have trouble, please keep the following in mind: Titles in which an apostrophe is used within a word will come before a title using the complete spelling (Lovin' comes before Loving), etc. Titles beginning with a contraction follow titles that begin with a similar non-contracted word (Can't follows Can). Titles such as I.O.U., D.O.A., and SOS will be found at the beginning of their respective letters.

↑ : Climbed at least 10 notches in the Top 100  
since the last edition of *Top Pop Singles*.

**N** : New entry in Top 100.

This is the first time a ranking beyond 100 was published.

Artist's points are calculated using the following formula:

1. Each artist's charted records are awarded points based on their highest position (#1 = 100 points; #2 = 99, etc.).
2. Bonus points are awarded each record based on its highest charted position (#1-5 = 25 points; #6-10 = 20 points; #11-20 = 15 points; #21-30 = 10 points; #31-40 = 5 points).
3. Total weeks charted are added in.
4. Total weeks an artist held the #1 position are also added in.

When two artists combine for a hit record (Ex: Paul McCartney/Stevie Wonder; Supremes/Temptations), their chart points are shared equally.

Artists such as "Simon & Garfunkel", "Sonny & Cher" and "Loggins & Messina" are considered regular recording teams and their points are not split or shared by either of the artists individually.

# #1 RECORDS LISTED CHRONOLOGICALLY

For the years 1955 through 1958, when Billboard published more than one weekly pop chart, the chart title and #1 weeks on each chart are listed beneath the record title.

The date shown is the earliest date that a record hit #1 on any of the pop charts. The weeks column lists the total weeks at #1, from whichever chart it achieved its highest total. This total is not a combined total from the various pop charts.

Because of the multiple charts used in my research, some dates are duplicated, as certain #1 hits may have peaked on the same week on different charts. Billboard also showed ties at #1 on some of these charts, therefore the total weeks for each year may calculate out to more than 52.

See the introduction pages of this book for more details about researching the pop charts.

- DATE HIT #1 : Date first peaked at the #1 position.  
 WKS AT #1 : Total weeks held at the #1 position.  
 \* : Consensus #1 record - hit #1 on all pop charts published (1955-58).  
 † : Indicates record hit #1, dropped down, then returned to the #1 spot.  
 F : Frozen chart - total weeks at #1 include one frozen week. Beginning in 1976, Billboard ceased publishing a year-end issue. The year's last regular issue is considered frozen and all chart positions remain the same for the unpublished week.

## CHART ABBREVIATIONS:

- BS : Best Sellers  
 JY : Jockeys  
 JB : Juke Box  
 TP : Top 100  
 HT : Hot 100

## 2-Sided #1 Hits:

- Don't Be Cruel/Hound Dog ... Elvis Presley (1956)  
 Come Together/Something ... The Beatles (1969)

The above two records are rare instances of a double-sided #1 smash hit. Each side had enough strength to capture the #1 spot and the music trades had a difficult task in determining which side to list first. The Elvis' hit, during its long run at #1, had each side take its turn at #1. The Beatles' hit, after flip-flopping its way up the Top 10, finally peaked at #1 for 1 week and was shown as Come Together/Something.

684 records have hit the #1 position on Billboard's pop charts from 1955 through 1986. "The Twist", even though it hit #1 in 1960 and again in 1962, is counted only once. There have been 618 #1 records since the Hot 100 chart debuted in 1958.
